

Stage 0: Provisioning (56)

Establishing & authenticating
evaluation infrastructure

Step A: Harness Installation (56)

Strategy 1:
Git Clone (56)
(Source installation)

Strategy 2:
Python Package (53)
(Pip/Conda/Poetry)

Strategy 3:
Container Image (12)
(Docker/OCI)

Strategy 4:
Binary Package (2)
(Standalone executables)

Strategy 5:
Node Package (1)
(NPM/NPX)

Step B: Credential Configuration (47)

Strategy 1:
Repository Authentication (42)
(Hub/Registry access)

Strategy 2:
Model API Authentication (38)
(Remote keys)

Strategy 3:
Evaluation Platform Authentication (10)
(Service login)

Stage I: Specification (56)

Defining SUT & benchmark configuration

Step A: SUT Preparation (53)

Strategy 1:
Model-in-Process (43)
(Local Inference)

Strategy 2:
Model-as-a-Service (39)
(Remote Inference)

Strategy 3:
Interactive Agent (15)
(Sequential Decision-Making)

Strategy 4:
Non-Parametric Algorithm (8)
(Deterministic)

Step B: Benchmark Preparation (53) (Inputs)

Strategy 1:
Benchmark Data Preparation (51)
(Offline/Static)

Strategy 2:
Synthetic Data Generation (23)
(Generative)

Strategy 3:
Simulation Environment Setup (8)
(Interactive/3D)

Strategy 4:
Production Traffic Sampling (4)
(Online/Live)

Step C: Benchmark Preparation (53) (References)

Strategy 1:
Ground Truth Preparation (51)
(Annotations/Indexes)

Strategy 2:
Judge Preparation (34)
(Model-based evaluators)

Stage II: Execution (53)

Running SUT with benchmark inputs

Step A: SUT Invocation (53)

Strategy 1:
Batch Inference (53)
(Standard completion)

Strategy 2:
Interactive Loop (17)
(Stateful/Agentic)

Strategy 3:
Arena Battle (7)
(Side-by-side comparison)

Strategy 4:
Production Streaming (4)
(Real-time monitoring)

Stage III: Assessment (56)

Computing metrics from
SUT outputs & references

Step A: Individual Scoring (56)

Strategy 1:
Deterministic Measurement (50)
(Exact match/Distance)

Strategy 2:
Subjective Measurement (33)
(LLM-as-a-Judge)

Strategy 3:
Latent Measurement (27)
(Embedding similarity)

Strategy 4:
Performance Measurement (21)
(Latency/Cost/Efficiency)

Step B: Aggregate Scoring (54)

Strategy 1:
Distributional Statistics (54)
(Averages/Ranks)

Strategy 2:
Uncertainty Quantification (13)
(Confidence intervals/PPI)

Stage IV: Reporting (46)

Visualizing & communicating
evaluation results

Step A: Insight Presentation (46)

Strategy 1:
Chart Generation (25)
(Radar/Trend plots)

Strategy 2:
Dashboard Creation (25)
(Interactive UIs)

Strategy 3:
Leaderboard Publication (22)
(Public/Private ranking)

Strategy 4:
Subgroup Analysis (22)
(Slicing/Demographics)

Strategy 5:
Execution Tracing (18)
(Trace logs/Trajectories)

Strategy 6:
Regression Alerting (5)
(Historical comparison)
